#### MAXIMUM RATINGS ( $T_A = 25^\circ\text{C}$ )

| Parameter                                        | Symbol         | Value       | Unit             |
|--------------------------------------------------|----------------|-------------|------------------|
| Reverse Voltage                                  | $V_R$          | 80          | V                |
| Forward Current                                  | $I_F$          | 100         | mA               |
| Operating Junction and Storage Temperature Range | $T_J, T_{stg}$ | -55 to +150 | $^\circ\text{C}$ |

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.
